

## Service Benefits

### In-Network Service Benefits

- Services of the benefit plan are available through in-network providers who are contracted for specific services. For more information on specific available services, call (720) 490-4400. All providers must be credentialed and contracted to participate in BHI's Network. In certain circumstances a single case contract may be arranged for a BHI non network provider.
- Benefits are in effect only when the provider adheres to BHI's referral and utilization management procedures.

### Out of Network Benefits

- There are no benefits available for out-of-network services. Services provided for psychiatric emergencies are the only benefit allowed by out of network providers.

### Collection of Copayments/Deductibles

- Medicaid enrolled consumers covered in our program are not subject to co-pays or deductibles. Collection of fees directly from Medicaid consumer may result in termination as a participating network provider. This includes failed payments.
