

YOUNG PERSONS ECOGRAM OF FORMAL AND INFORMAL SUPPORTS

-  Formal Supports
-  Informal Supports
-  Closed

A personal ecogram is a graphic representation (visual) that depicts relationships, activities and influences that a child has in the family system. The ecogram would include family members, influential friends or mentors, other relatives, and activities of importance. A code (connecting lines) is used for depicting relationships and their strengths. For example a dark, heavy line for a strong influence, a dotted line for a distant relationships and a zigzag line may be used to depict a stressful relationship.
